SUMMARY

Full Stack Web Developer with a background in customer service and life-long dedication to learning. Effective at combining determination and problem solving to develop user-friendly applications. Known among staff for strong work ethic and teamwork no matter the complexity of the project.

TECHNICAL SKILLS

Technology: JavaScript, CSS, HTML, MongoDB, Mongoose, MySQL, Sequelize, Jest, Server Side Templating, Restful APIs, Axios, GraphQL, and many more. Check out my GitHub or Portfolio to learn more.

Frameworks: React, Node, Express, jQuery, Bootstrap, Tailwind, Bulma

PROJECTS

GTX-Mobile-Detailing | Full-Stack for Client

<https://github.com/HacAtac/GTX-Mobile-Detailing>

<https://gtxdetailing.herokuapp.com>

Tech Used: JavaScript, MongoDB/Mongoose, Express, React, Node, GraphQL/Apollo, JWT.

- Full stack booking application that allows client to use CRUD methods to maintain his services. And so that his clients can book and pay through the application.
- Worked collaboratively on both back end and front end. I've made and tested the queries, mutations and then implemented full CRUD functionality on Users and Services.
- JavaScript, MongoDB with Mongoose, Express, Node, React, GraphQL with Apollo.

AW-SOME Organics | Full-Stack for Client

<https://github.com/osbym/awesome-organics-gp2>

<https://awesomeorganics.herokuapp.com>

Tech Used: JavaScript, MySQL/Sequelize, Express, Handlebars(server side templating), Node, Sessions, RESTFULL API.

- Full stack e-comm application that allows client to display and sell her products online. Utilizes sessions for user login/signup, operational CRUD methods setup on backend for products.
- Worked collaboratively on both back end and front end. I've used server side templating to dynamically create the different pages that were necessary.
- JavaScript, MySQL/Sequelize Express, Node, Rest API, Sessions, Bcrypt, Handlebars.

Employee Tracker | Node Command-Line Application
<https://github.com/HacAtac/hacEmployeeTracker>
<https://watch.screencastify.com/v/qRwBBmEJYXPRyPfbVsKU>
Tech Used: JavaScript, Node, Inquirer NPM, Node-Util, SQL

- This command line application fulfills all CRUD operations by allowing the user to create and delete employees, roles, and departments; As well as view employees by department, role, or manager and update said role.
- Used async await promise functionality to map all current rows from a table before the user is presented with the inquirer prompt.
- Successfully used foreign keys and inner join to associate employees with their designated department.

SocializeAPI | Back-End
<https://github.com/HacAtac/hacSocializeApi>
<https://watch.screencastify.com/v/zXc3jY3S0y3Hv9QVfF1Y>
Tech Used: JavaScript, Node, Express, MongoDB, RESTful APIs, CRUD Methods

- This application fulfills all CRUD operations by allowing the user to Create, Read, Update, and Delete, users, thoughts, reactions, and friends.
- Used MVC paradigm in order to keep code re-usable and helps with separation of concerns.
- Successfully used sub-documents and relational documents “tables in SQL” to populate objects within a parent object.

EXPERIENCE

Full-Stack-Bootcamp	2021-2022
University of Texas, Austin	Online 6 Months
<ul style="list-style-type: none">• Constructed two Full-Stack applications for Clients to meet the Users’ Story and Acceptance criteria. Gained real-world knowledge about how to work collaboratively and to meet the end game needs.• Effectively learned the fundamentals of front-end and back-end development utilizing best practices to keep code DRY and re-usable. Became familiar with the value of using a MVC paradigm so that separation of concerns is minimized while working collaboratively.• Supplied support for cohort whenever necessary.• Increased personal knowledge base of the newest technologies by applying the Pomodoro Method.• Gave guidance throughout debugging by: sharing expertise in what to look for in error messages, where to look for the cause of different errors, and where to console.log when errors messages are not present to find the problem.	

Costco Wholesale**2018-2022****Pflugerville, Tx, 78660****Meat Department**

- Exhibited strong teamwork by learning and adapting new skills from merchandising, front end customer service, and food safety
- Managed coworker dynamics in a way that was conducive to ensuring tasks were completed
- Exhibited the Costco culture of receiving feedback from members and making adjustments as necessary
- Successfully partnered with various departments to ensure Costco standards were maintained

EDUCATION**Bootcamp Certificate: University of Texas at Austin**

A 24-week intensive program focused on gaining Full-Stack technical programming skills.
